Twinshaft Mixer Wear Parts

ConSpare

CONCRETE PRODUCTION EQUIPMENT

ConSpare has introduced a new range of mixer spares for twinshaft mixers. We supply a comprehensive range of wear parts including mixing blades, arms, lining tiles, end plates and shaft sealing components for most makes of twinshaft mixer from stock.

Blades and scrapers are available in 3 abrasion resistant materials. ConSpare cast blades are manufactured using a unique double heat treatment process combined with high chrome content for exceptional through-hard durability to optimise performance. Hawiflex components are light-weight for easy installation, minimise concrete adherence and are impact resistant to prevent damage during cleaning. ConSpareUltra tungsten carbide coated parts extend service life by up to 10 times to reduce costly maintenance.

Arms, lining tiles and end plates

Shaft seals and bearings

Optimises mixer performance

Safer, simpler cleaning

Ex-stock availability

Comprehensive range

Cast Steel Grades to Combat Different Wear Patterns

Component	Material	Specification	Hardness (HRC)
Blades & Scrapers	CS 560	Case-hardened Cast Cr-Mo 15/3 Martensitic Structure	62 - 64
Wall Lining Tiles	CS 550	Case-hardened Cast Cr 13% Martensitic Structure	60 - 62
Arms	CS 580	Cast Steel Designed for extra malleability	N/A

Heat treated cast steel for extra durability

ConSpareUltra central blade with tungsten carbide tiles

Hawiflex synthetic rubber with raised ribs to aid mixing
